

3630651 - Accessing Transaction Code OASV in SAP S/4HANA

Component: FI-AA-AA-C (Financial Accounting > Asset Accounting > Basic Functions > Transactions), Version: 1, Released On: 10.07.2025

Symptom

Attempted access to transaction code OASV in S/4HANA.

Environment

- Financial Accounting (FI)
- Asset Accounting (FI-AA)
- SAP enhancement package for SAP ERP, version for SAP HANA
- SAP S/4 HANA
- SAP S/4HANA Finance

Cause

In ECC, transaction data was getting posted separately in Assets Accounting through 'AS91-Takeover values' and General Ledger Accounting through OASV/FB01.

With ABLDT posting in S/4 HANA, both Asset Accounting and General Ledger Accounting are updated at the same time. Therefore, there should be no need to use the OASV transaction for a common asset data load.

Resolution

In S/4 HANA, asset transaction data is posted through ABLDT, which updates both Asset Accounting and General Ledger Accounting simultaneously. This integrated approach ensures that no reconciliation issues occur.
