

3119168 - Assign development package to project – SAP S/4HANA 2021 2022 2023-Migration Cockpit

Component: CA-LT-MC (Cross-Application Components > Landscape Transformation > S/4HANA Migration Cockpit), Version: 10, Released On: 07.04.2025

Symptom

You can use the report attached to this SAP Note to assign a development package to a migration project that was created using SAP S/4HANA 2021 or lower. Note that report is relevant for migration projects that use the migration approach "Migrate Data using Staging Tables". A development package is required to transport the project to another system in your system landscape using the Change and Transport System (CTS).

Other Terms

CTS, MC, Migration Cockpit, Staging table

Reason and Prerequisites

- SAP S/4HANA
 - Migrate Your Data – Migration Cockpit
 - Migrate Data Using Staging Tables

This SAP Note is valid for:

- SAP S/4HANA 2021
- SAP S/4HANA 2022
- SAP S/4HANA 2023

Solution

Use the report 'ZMC_CHANGE_DEVC' that is attached to this SAP Note.

To assign a development package to a migration project that uses the migration approach "Migrate Data using Staging Tables, specify the relevant migration project name and development package and choose *Execute*.
