

## 3592651 - Tool for mass assignment of Settlement Rules for Assets

Component: FI-AA-AA-C (Financial Accounting > Asset Accounting > Basic Functions > Transactions), Version: 2, Released On: 08.04.2025

### Symptom

There is need to maintain multiple settlement rules for multiple assets under construction (AuC), which is not feasible to do manually.

### Environment

SAP S/4HANA > Finance > Accounting and Financial Close > Asset Accounting > Basic Functions

### Reproducing the Issue

Attempt to create settlement rules for multiple assets using transaction AIAB.

### Cause

The issue arises from the need to create settlement rules for multiple assets, which is not feasible to do manually.

### Resolution

1. Settlement rules can be maintained in transaction AIAB only.
2. Alternatively, Batch Input for AIAB can be used.
3. Please note that there is no BAPI or similar function module for this purpose in the SAP standard. Additional development activities would be necessary.
