

1756741 - Missing investment support areas when creating an asset in AS01

Component: FI-AA-AA-A (Financial Accounting > Asset Accounting > Basic Functions > Master Data), Version: 5, Released On: 27.10.2025

| Symptom

You have created new depreciation area defined as investment support areas, however it does not appear in AS01 when creating a new asset.

| Environment

- Financial Accounting (FI)
- Asset Accounting (FI-AA)
- SAP R/3
- SAP R/3 Enterprise 4.7
- SAP ERP Central Component
- SAP ERP
- SAP enhancement package for SAP ERP
- SAP enhancement package for SAP ERP, version for SAP HANA
- SAP S/4HANA Finance
- SAP S/4HANA

| Reproducing the Issue

1. Create an asset with transaction code AS01.
2. Check in tab 'Deprec.Areas' for the newly created investment support area: it is missing

| Cause

Missing configuration

| Resolution

Normally in order to setup an investment support area, the depreciation area may require following G/L Posting Indicator and Value Maintenance in transaction OADB:-

1. Posting in G/L -> 1 Area Posts in Realtime
2. Investment grant -> Only Negative Values or Zero Allowed
3. APC values -> No Values Allowed
4. Ord. Depreciation -> Only Positive Values Allowed
5. Net Book Value -> Only Negative Values or Zero Allowed

NOTE: Investment support may also be managed in a normal area (mostly leading area 01). In that case the investment support area is optional and if existing, it will not post to GL. Therefore, the G/L posting indicator 1 (Area Posts in Realtime) would not be necessary in such a case. In general there are always some exceptions or special cases where customizing might be different.

For example:

You have the investment measure I7

Investment measure I7 has support area 76 as per your configuration in transaction code ANVEST.

When you go to AS01, depreciation area 76 will not appear.

If you go to 'Allocations' tab and enter I7 under section 'Investment support measure', depreciation area 76 will appear in 'Deprec.Areas' tab.

In other words, investment support depreciation area 76 will appear if you enter investment support measure I7 in the asset master record.

This is why when you run AS01, depreciation area 76 does **not** appear as default based on the setting in OAYZ.

IMPORTANT: Be ensured that the Screen Layout Rule is marked to Opt/Req. in order to show the Investment Support measure in Asset Master Data, otherwise the field will not show and will not be ready for input.
