

3325431 - Error message AC528 occurred during depreciation recalculation

Component: FI-AA-AA-E (Financial Accounting > Asset Accounting > Basic Functions > Periodic Posting),
Version: 3, Released On: 15.07.2025

Symptom

When performing depreciation recalculation via transaction AFAR, error message AC528 "Depreciation area &1 in ch.of dep. &2 does not adopt values" occurred.

Environment

- Financial Accounting (FI)
- Asset Accounting (FI-AA)
- SAP S/4HANA Finance
- SAP S/4HANA

Cause

In S/4 HANA the posting logic is completely different. It is not allowed to manage areas without value takeover. The SAP standard behaviour is that it is necessary to adopt values from another area.

Only for the following exceptions the area to overtake values is empty:

- Leading depreciation area
- Real revaluation areas that post online and do not manage APC
- Investment support areas

Resolution

If the depreciation area does not fall under any of the categories mentioned in the 'Cause' section, set a reference area in transaction OABC.

Error message AC528 is in consulting nature. For further support on this matter, it is recommended to contact the local Consultant for assistance.
